FEATURED CUSTOMIZED TRAINING

CUSTOMIZED CORPORATE RE-BRANDING WORKSHOP FOR ROYAL PLAZA ON SCOTTS

Maxine is engaging and helped us absorb information much easier. Highly recommended as the workshop helps us understand the new brand values better, and how to execute them in our daily work.

– Siti Nadiyah Zainal

Maxine's colorful ways made the training interactive, and boring is definitely not in her vocabulary. She is the epitome of passion when it comes to sending the message across. I gained a better understanding of our core values and to be one with all.

– Tiorida

CUSTOMIZED STRATEGIC THINKING SKILLS WORKSHOP FOR RAFFLES MEDICAL GROUP

Mr Andrew is knowledgeable and has used many practical examples during the course. He has made it interesting throughout. He has helped us learn to think out of the box and diversify the ways in which we think and manage things.

– Cynthia Ko

The workshop was very informative and useful to our project and work. I learnt to be innovative, as problems may not be resolved by that single method, but through other different methods. Keep up the good work!

– Dawn Chin

LUNCH & LEARN ON SUN TZU'S ART OF WAR FOR SUCCESS FOR PAP COMMUNITY FOUNDATION

Highly recommended. The facilitator is engaging and fun!

Mr Lim is knowledgeable and lively in his presentation, and able to engage the audience.

I learnt that the external environment affects business strategies. Avoid war and only choose war if you can win by peaceful means."

Strongly recommended for our ground staff to attend. Would like to attend the full day course.

DATA VISUALISATION USING TABLEAU FOR BEGINNERS

28 Apr | 17 Jun | 5 Aug | 21 Oct | 8 Dec

Ideal for: Leaders & Managers, Team Leaders, Trainers & Coaches, HR personnel

Tableau is the fastest growing interactive data visualisation software used in the Business Intelligence industry. It helps in simplifying raw data into an easy-to-understand format. Tableau is also able to connect and extract the data stored in various places. It can pull data from any platform imaginable, from excel and pdf to a complex database like Oracle and Amazon webs services. The great thing about Tableau is that it doesn't require any technical or any kind of programming skills to operate.

In this highly intensive and hands-on 1-day course, you will gain a comprehensive understanding of Tableau – how to use, how to gather data, how to clean the data, and how to use the various tools provided by Tableau. You will also be introduced to important concepts and techniques in Tableau to move from simple to complex visualisations and learn how to combine them in interactive dashboards.

KEY TAKEAWAYS

- Identify the core principles of data visualisation and data storytelling
- Identify the different types of business questions and analytical patterns
- Be able to conduct exploratory and diagnostic analysis
- Develop dashboards as part of data storytelling for business needs
- Understand and work with Tableau
